

**SocioPsychology RootKit for Mental Institutions**

<https://0x8.ch/HackersCardgame7>

**Inventor: Satan**

Situation in H7.2 Mental Königfelden. There are a "few" older patients that **tries to make the young patients more psychotic** to make it look more legitimate to give them Antipsychotics. There seems to be one Master Peda-Patient that commands the other pedo-`patients` . They also influence the the psychiatry nurses maliciously (making the nurses angry on the young patient, b&t! Card!) that normally ends up that the Young patient is being forced to take licence-reducing drugs.

Just in case im Right with this card, it would be important to find all the young patients that "got victim of Sondersetting" (german) and help them with equalaged good people.

**Year: ~????**

**m1143**

**Inventor: xxxxx**

The Psychiatrists tend to give normal people only information that causes euphorial and filter that information that would cause psychological pain. Technically this would be Natural Language Processing and Patter Recognition Algorithms. All the sins people should confess and atone stay hidden. It would save lives if people would confess and atone. Snobish overrate one single bit of truth about their sins would cause rage and even make the sinners run amok. **This is a military thing:** In Boy Scouts Arau where many armed Officers have grown up the Shrink can pop all the "bad trips" by using his voice-key "Spontane Entladung" and people like Urs B. would run amok overwhelm by the facts that he almost killed Marc Jr. It is even more worse if the shrinks helped those armed sinners to sue their victims or kids. Suing the victim (Suing Marc Jr) was therapeutic for Urs B. but in the end the problem just got bigger and forked to the prosecuting attorney, autopoeis.

**Pre-Detection of euphoria and pain of certain information**

## Fixation (psychology)

<https://0x8.ch/HackersCardgame7>

**Inventor:** ~~xxxxx~~ **Year:** ~???

"Fixation" (German: Objekt Fixierung) concept make young people focus on more on things than on humans. So it becomes more easy to manipulate the young people. Additional you could even make the young kids follow a evil symbol system. Patch: Kids learn also Psychological Concepts

**CARD WAS CHANGED IN MENTAL INSTITUTION TO MAKE FOOTBALL CLUBS ATTACK MARC**

**For Kids:** playing / learning (toys), sports, coping strategy, ...

**For Adults:** can unfortunately be adapted to sell random junk that has slightly to do with Soccer / Football / \*ball / Burger ... see m15 cards

## faith detection

<https://0x8.ch/HackersCardgame7>

**Inventor:** ~~xxxxx~~ **Year:** ~???

with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (**t1 card**) would be sufficient to extrapolate for example also the parameter **faith**. This card was added after i leaked m57 Card... There seems to be an algorithm, that records what one is doing for example during a week, saves the good scenes and then **tries** to create a Suicide Death Bot with this inverted good scenes.

Additional they seem to drop all connections from the victims t1 to other allies, so no-one could help.

Workaround: Listen to music you love. I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for the detection algorithms to identify your emotions.

## public class Object

object ist die Schablone mit welcher alle anderen Schablonen hergestellt werden, bzw. sagt man "von der alle anderen Klassen (**Schablonen**) erben".

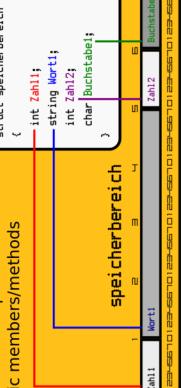

```
public class person
protected class fahrzeug
private class object
```

Berechtigung: Schluesselwort dass jetzt eine eine Vorlage für eine Klasse (Schablone) kommt

<https://0x8.ch/HackersCardgame7>

**Inventor:** Alan Kay  
**Year:** ~1993

Tell the computer to define an object, which is a element (a12) where the possible values are defined and stored it in Memory (see also **struct** /C++) but there are also "functions" that are called "methods". A class/members/methods can be public, protected and private. There are static members/methods

**Inventor:** **xxxxx**  
**Year:** ~???

One of many conspiracy theories like "Chemtrail" conspiracy, is "offered" by Google, as soon as one falls out of the standard consumer belief. In fact the photo shows only a balancing test of a Boeing plane. In order to be able to shift the weight of the aeroplane, it has pumps and water tanks. "Switching on the toxic sprays" is simply when the plane enters an air layer with more humidity.

Some sort of **reverse-exploit** to such google queries one could use his native language and redefine the word with "**Ciel Volé**". What then would mean that it is a parable explaining, that the upper ranks in the mainframe are trying to make the lower ranks having no plain sight in the mainframe.

## Conspiracy Theory

<p><b>Suicide Death</b> <b>BOT - Spinal Cord</b></p> 	<p><b>a16b</b></p> <p><b>RISK SCORE: 10</b></p> <p><a href="https://0x8.ch/HackersCardgame7">https://0x8.ch/HackersCardgame7</a></p> <p><b>Inventor:</b> <b>xxxx</b></p> <p>Even more worse than a Suicide Death Bot that induces a Psychosis with Electronical/Psychological War to induce a suicide (attempt) would be some sort of Suicide Death Bot like Stuxnet that attacks the Spinal Cord implants of eg. Whistleblowers, Whitehat Hackers or people that asks "to many" questions or people allied with such people, i mean with "rapist-terrorists".</p> <p><b>Year:</b> ~????</p>	<p><b>f-1(x)</b></p>  <p><b>Security Software</b> <b>and exploitation</b></p> <p> </p> <p><b>Warning: seems to have disassembly protection...</b></p> <p><b>Inventor:</b> <b>xxxx</b></p> <p>On the mainframe there are many software modules that warn people from risking their lives or their health. Unfortunately some people wrote a generic algorithm, that rewrites things like "don't touch that" to "touch it now, touch it fast" or "stop here" to "continue fast". So people would get hurt by the security software that should prevent that they get hurt. The same thin like someone would stick a "good medicine" sticker over a biohazard sticker. We should add additional algorithms that prevent such modifications. Possibly it is also just a second system that evaluates the "WARNING" message and then takes over the Human-BOTS, Stomoeiver, Neuralink ... after one found such a malware they often sell it as feature to train students, not considering what such a malware could cause harm or even kill innocent kids</p> <p><b>Year:</b> ~????</p>
