

Pink Unicorn-Pony

m31

Inventor: Satan? **Year:** ~????

I hear, that i will be punished death by an equal aged girl if i continue writing the text here...

so in this case the equal aged girl would maybe add the text here later or on Layer8 (Iso-Osi Model)

search detection

m125

Inventor: XXXXX **Year:** ~????

They seem to have some sort of function on Stimociever, Neuralink to detect if you try to find something. That activates an eventtrigger that then samples the person you fear most (Pisterer) say things like:

- HAHAA, i hold it in my hand (+video Sample)
- What does he want, HAHAA

(additional b1 card is activated with the sample)

Especially annoying when they do it if you try to find your sex toys... prerequisite maybe m98 card, often plays loop multiple times, c02>a16 In my particular case they seem to have a fetish triggering that in private life, maybe they hope, i would not leak it then... as you see, i would "not", and if you talk about that they even begin to render things on your sex toys, that suxx even more

big systemchanges in little time as Psychological Warfare

m88

Inventor: XXXXX **Year:** ~????

The principle from m88 card where we suggest not to do big system changes in little time the old people use explicitly for psychological warfare. For example they let us play with equal aged people on the communication systems, and the old people sees that we have a harmonic discussion then he seems to enjoy blowing up the group of equal aged kids or equal aged young people.

3D model of victims apartment

m98

Inventor: XXXXX **Year:** ~????

They have some sort of a 3D Model of victims, whistleblowers, whitehaters, Lab Rats, Verdingkinder **apartment** where they can set eventtriggers (t14) or even create an at1 out of their victim. Generated from eg. RetinacCD (level, a19, photogrammetry) or body telemetry (RFID in extremities) or an older system like resonant circuit. Maybe a persons position could be extrapolated just from acoustic data, for example if you have more than 2 laptops with microphone (see IEEE1158) and a model of the apartment. They have also access to my amygdala implant (b1) and at the same time triggering CAP (d3) card. The Apartment was selected by Atums in 2002 (interactive, bidirectional, almost killed me), i guess they are testing new systems, new socio-psychological design-patterns, new Cyber-war equipment / patterns. They seem to use Loops to "hide" things even police is affected: they did not "saw" a laptop that was obvious on the table, they **also "hide"** wound care material, and that is **really bad**.

Morality

m24

Inventor: Konjunktiv II **Year:** ~????

Glasses will be precious in the near future! With just a bit of imagination one could the two glasses that were in a nice blue cardboard as the twin-towers of the holes from the airplanes. When i Asked Urs Astrid Blum (there was a time when i trusted them) in 2002 what they think about my Case: Behavioral Sciences zu den jungen Schafen + Glupscher, Satane zu den alten Schafen (m7,m8 card)

Morality generally refers to the actual action patterns, conventions, rules or principles of individual individuals, groups or cultures. It would be better to say norms, values, categorical imperatives, which serve the general public as well as the individual, the counterpart to egoism. To keep the system stable and create sufficient reserves, so that it does not break, if something small goes wrong and / or become Sodom & Gomorra (Hebrew סודם וגומרא).

Gorge Orwell 1984 Rat Scene

m139

Inventor: XXXXX **Year:** ~????

This scene is possibly a simili for a shrink making one of his patients (or LabRats as the shrink thinks of *CAP* his patients) psychotic and making him / her attack the Whitehat / Whistleblower. The "LabRat" would then attack the Whistleblower / Whitehat as soon as he is connected to the victims Virtual World (m98, m99)

Inventor: Konjunktiv II **Year:** ~????

Gruppen von alten glupschenden Männern und Frauen, die in einem Schwarm-Algorithmus ein Maximum an Psychotherapien verursachen und so das jüngere Oper psychothorisch machen. Diese Human-BOTS waren somit alle gut fernsteuerbar von Satans Terrornetzwerk. Für mich als 40 jähriger Mann ist das schon mühsam, wie schlamm muss das für eine junge Frau sein. Bekannte Personen wie z.B. Eltern sind weniger schlamm.

Der 1940er Satan wurde diese Karte z.B. den Eltern Opfers zuspielen um es so auszugrenzen, zu isolieren und dann in der Psychiatrie zu "behandeln".

Use Case: Behavioral Sciences zu den jungen Schafen + Glupscher, Satane zu den alten Schafen (m7,m8 card)

Automatic Behavior
