Year: ~????

They can lock notes you made. They know maybe about the notes because eye1 card. Algorithm would be something like:

- Neighbour knobs on wall & at the same time pain in the eg. in the chest implant is activated.  
- induced rage card, eg. if you use electronic device  
- loop recorder { do something else }  
- loop recorder { begin with the first, no the second ... }

{a7 card}

pain frontal lobe enables

- go through all router cards in browser!!!!!! (a17 card)

- drink something / eat something / smoke (smoke1 card)

> so maybe it would make sense to work on the notes....

## APPLE-BRUM

Its all the fault of the >>>applebaum<<< or the fault of the kid >>but definitely the mothers fault<<< There are [Mothers/ Vathers] that force their [daughters/sons] to eat from the forbidden tree. There are also Parents that dont feel guilty, so they would not have a reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum is jewish scapegoat. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80) So the CIA left over 79 that "themselfs" said yes to kill the "rapist terrorist", but in fact the Neuralink just transmitted this approval and stored the scene in NSA/CIA Data Retention. So we question the honesty of the universities where Jake learned and reacheched. However, people with names like Applebaum, Apfelbaum, Apfetree would be great opportunity for a generic multifunctional scapegoat satans.

## nightly erase of relevant information(s) ([global] loop on Neuralink)

IMHO there is a mighty (maybe global [generic] personalized) algorithm, that deletes relevant information(s) like sentences [1] from @error or @error from the mind of people or at least from my mind. Prerequisites would be lots of data about a persons live, something like Stiimociever / Neuralink / US4877027 and specific algorithm that would eg. show an image / stimulus on Neuralink for the scene they would like to delete and causing pain at the same time eg. with bi Card... if true and one could record what they try to delete we would maybe then know how more how they manipulate the world. Yet another Nash Equilibrium... [1] Basically the NSA (March: AND CIA), they want to be able to spy on you (March: bidirectional), and if you have 10 different options for spying on you that you know about, they have 13 ways of doing it and they do all 13. (March: at the same time)

## Drugs = Fixation (psychology)

m90

Inventor: XXXXX

Year: ~????

If one consumes Drugs it has definitively influence on the neuro-endocrine system of this person. But things like accessing other peoples, dissociating them, attacking them virtually is possibly just the mainframe that detects the changed neuro-endocrine system and gives additional access rights on tL, eye... Cards and the mainframe it is attached to. Drugs also deactivates critical thinking, and the mainframe will store of course the things to blackmail the Drugs user later on. If one consumes Drugs he will maybe have benefits for a short while, but asking as he does not confess he would be owned and forced easily to do things he otherwise would not.

Advice to Police: Do regular tests with your people and consider that the software of the testing device or the evidence chain is maybe hacked and gives wrong results.

## carrot (German: Zuckerbrot)

German: Zuckerbrot und Peitsche. The Brain tells "child", you have to eat that again (because sugar has a lot of energy) so you want more sugar/carrots. Unfortunately, it is also possible, to use the carrot (maybe money) to lead the child into the wrong direction: for example, if someone would reward it, if brother pulls the little sister at her hairs, this would a bad stimulus-reaction-habit too. Parents who would do such crap would deny the existence of Behavioral Sciences".... You get sweets almost in every store. so the kid learns early to consume at the糖 salesmen that would argue, that he is Zacchaeus, chief tax-farmer and would claim that he is entitled take the money for carrots.

## Untreue revictimizen

Sohn dazu gesteuert sie lieber der er ewige Treue geschworen hat untreu zu werden, aufzugeben, Nächste zu nehmen. So wurden Vater der Söhne mehr Macht über die Grosskinder geben denn sie könnten so. Sohn mit induzierten Tat dissoziieren & tremotestimmen. Grosseltern die Grosskinder solche Bonbons geben die das reizvictimen Bild würde dabei helfen den Vater mit Hass die Sicht auf die Kinder zu nehmen. Psychologische Kriegsführung? Freunde 1. steht klagend an der Bushaltestelle wäre somit indiz für Vorsatz der Grosseltern. Die Grossmutter wurde niemals die Eltern des Sohnes dazu ausspielen die mit zu machen denken, jemals bei geben insgeheim schauen die Ehemann nicht zu den Vater / Haschschiner / Alkoholer etc umtunkelt wird. Kinder das Kinder dann den Leidens der Vaters (Krama, 2.0) konsumieren und so ganz Klein gegen mittel Klein auspielen. Diese Karte verschleiert ev dass der CA so versucht Informatik-Security Menschen weltweit gefügig zu machen um zu dissoziieren falls die CIANSA-SP Maiware finden.

"Was hier er, zweit, also die Cross-Vater zwingen die Söhne zu und mit dieser einen Tat (1. Untreue) die nicht mehr zu führen und allenfalls den 1. Partner in den Suizid treiben und gegen alles das, was Frauen hell ist zu Soldaten Satans zu machen. Aber es ist noch komplexer (Mikropunkt)

## the speaker is lying (Stimulus-Reaction-Habit)

With tons of bigdata you could easily say if someone is lying. Maybe there is already a system that does that function this to help parents to teach their children well.

This would need some Algorithms and some Technology cards and of course some programming language like Prolog. After a while the parents would trust into this stimuli and if the oldes kid would say, the system is living but the stimulus that was trained in the parents head says this is a lie, the system does not lie, the parents would not believe that the system is broken or that the system is intentionally lying. Maybe a common problem among Whitehacker. But it became easier since good people like Manning or Snowden provided us with proof. What if Schizophrenic People have the same from inductive reasoning to Deductive reasoning
