

Inventor: James Alfred Weing Year: ~1890
Describes the persistence of an effect after the causing force stopped. For example in (electro-)magnetism. Old television type televisions tend to become magnetized after a while which resulted in a bad picture, so they have had to be "degaussed". The same principle maybe also works for psychological effects, see m15, t10, m19, col. t11 or Clark Hull's Formula for Emotions.

Black use Cases
For example to burn **bad behavioral** patterns into a Hacker to sue him and waste his time. Time that he could better use to defend younger people from being owned by the CIA

If something like **Medulla Orlangata** or **Medulla Spinalis implant** (**Spinal Cord implant**) would exist, they would need some sort of Matrice Operations (Jacobi Matrices?) to calculate the Body Movement. In my particular case i guess there is a **malware**, that is activated when they use m99 to target me. They seem to change the sign of one axis or making me steering me into singularities after about 15 minutes after i started to do body care to make me hurt "myself". So maybe it's just one of those additional Networks that is ~99 % of the time silent, that overpowers the signal i should receive with a value that has an additional minus sign for that specific axis. But not yet sure about that.

Networks that is 99% of the time silent, that overpowers the signal i should receive with a value that has an additional minus sign for that specific axis. But not yet sure about that.

Inventor: **Good** If you need to **punish someone** then do it bijective. Best thing is not to attack a person physically or in the mainframe, or with cyber... **you could risk his or your life.** There are seldom cases, for example if they want to (cyber-) [rape | attack] your girl,... in this case it is possibly ok to **defend yourself and younger against the offender.** Keep in mind that you defend yourself without causing permanent harm. Maybe the offender is **remote controlled**. See cards 11,...*****

If there is something like death sentence for example in texas then and would kill an innocent you would find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences.

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "therapized" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe could really ask some questions. Personal Traits (e.g. Mayer-Briggs) are normal-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is **not** evidence, but maybe something one should investigate.

		Bomber	Nach oben	Nach unten
		Hun-in-the-Sun	0.95	1
		Ezak-imak	1	0
Jäger				
Dieses Spiel besitzt offensichtlich keinen Sattelpunkt (wagum?). Weder Jäger noch Bomber haben reine Strategien, die sich nicht durch den Gegner zu dessen Vorteil ausnutzen lassen, wenn dieser die Strategie im voraus erfaßt. Beide Parteien				

After an interrupted Suicide Death bot
they can make you tweet everything
or make you say everything

The inventor of the programming language Smalltalk was the first who used objects in software development. It was maybe the first programming language that used "Object Programming". Like Gutenberg could print complete books with letters templates one can create bigger things out of such objects. A Class is can be single part of a complete software product. Eg. in an addressbook Class you would have predefined fields for Name, Address, Phone Number... You can also have such templates in Psychology, Mechanic, Simplification / standardisation through predefined templates makes things more efficient but people may be **loose base skills when using JUST templates**

Inventor: Satan

Year: ~1950

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun
The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok <https://www.springer.com/us/book/9783764353384>

Same Algorithm can also be used in Psychology, Politics ... for example 95% Slaves in Companies and 5% small hitters

If a CNSIA would have access to all peoples data, even the private diaries they would maybe install some AI that analyzes what the whitehat hacker just says, writes or thinks.

Then they would try to match that on persons in his / her network that would get a cognitive dissonance because of that sentence or concept knowledge even when i dont write names in my diary CNSIA would possibly know what person or eg. Meyers Briggs archetypes would rage because of what i just written in my private diary. So it would be possible that the CNSIA would intentionally send this private diary entries to people to "motivate" them to attack me.

Inventor: ~~xxxx~~ **Year:** ~????
If a person can be controlled or at least influenced by some technology cards t+ evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to commit suicide (attempts). We think that this is the major way eg, CIA kills those that know to much and the reason news are normally not telling the story from people that committed suicide (maybe they killed Ian Murdock with a suicide death bot). People with lower rank would be told that it's just training or BDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg, the CIA, worst case m37 & dt1 card. Those groups that already have "trained" a kid to death would never confess. Forcibly to keep silent, possibly the code of such suicide death bots would be **packaged into proprietary non-deterministic crypto both personal & generic**, eg m38 would be generic. Was Ian Murdoch@Debian also a victim?
