In my opinion people tend to focus to much on their genetic material, but knowing that we have lobsters as common ancestors and that they usually fight against each other to get the girl-lobster would be of use. mankind calls itself "intelligent" but follow these old lobster habits is maybe not that intelligent: Sorry German: A mad "scientist" maybe used swiss mental institutions and the #Verdingkinder for genetical enginnering. If one of the victims would find out that this would be true it would maybe have a lot of trouble, they also would like to know what sort of genetical material works best with eg t1 card

pituitary gland or hypophysis

In vertebrate anatomy, the pituitary gland, or hypophysis, is an endocrine gland about the size of a pea and weighing 0.5 grams (0.018 oz) in humans. It is a protrusion off the bottom of the hypothalamus at the base of the brain. Hormones secreted from the pituitary gland help to control growth, blood pressure, energy management, all functions of the sex organs, thyroid glands and metabolism as well as some aspects of pregnancy, childbirth, breastfeeding, water/salt concentration at the kidneys, temperature regulation and pain relief.

The mental institution and they just tried to find out my perceptual threshold. The problem was that someone used this scene on the street or in my car and also flashed me, that revictimized the **scene in the Mental Institution** and made me massive paranoid. I dont knwo if psychological terror on the street was intentional or if this was that just that the CIA stole the data and abused it against me. Question would be, what could one do with massive blade-server & IEEE1588, eg. t1 card and a techno-party where many young people go to.

EEG / FLASH QFIRE?

I did not find any image from such a device. In Psychiatrie Königsfelden (P4) there is an EEG installation. They measure your EEG with electrodes and in the same time it produces flashlights with a stroboscope. The **flashlight cause peaks on the EEG?** Unsure if that was "service" of the mental institution and they just tried to find out my perceptual threshold. The amygdala, also corpus amygdaloideum; Latin, from Greek ἀρյγδαλή, is one of two almond-shaped groups of nuclei located deep and medially within the temporal lobes of the brain in complex vertebrates, including humans. Shown in research to perform a primary role in the processing of memory, decision-making, and emotional reactions, the amygdalae are considered part of the limbic system. **NOT VERIFIED BY ME SO FAR!!!**

Development / processing of anxiety, fear and anger, "fight or flight" - understanding or manipulating reaction, "rage", possibly

such things in hospital and sterile environment, you could loose permanently eyesight. So maybe not the best idea. Workaround for hacked Retinaccd would be to jam the frequencies used by the Retinaccd. Another thing would be to find eye entral Server (**CIA(NSA?)**), then one could prove that the system is **bidirectional**, that they stalked Marc Jr since he was a 13 years boy old in Karaa BEZ (Écriture automatique). The cams that were installed by Alina AG would therefore be the scapegoats that distracts from this card, and that eg. INSERT: 1960s parents stalked their **underage kids even in their beds**. More relevant they use Photogrammetry to create m89.

As a Christian and psychology student, she saw that the Nazis are killing jews, patients in mental institutions, innocents. She began to print flyers with her brother, distributed them at her university to stop Hitler. Unfortunately she and her brother was sentenced to death by a Nazi judge and murdered by the Nazis

May white roses materialize on her tomb

Opinion: Germany be proud on people like Sophie Scholl who had that much courage to give up

ENDOCRINOLOGY

The (neuro-) endocrine system is highly complex. So one can influence behavior and health with homeopathic doses of chemical substances, but also with behavior or radiation. For me it is to complex to understand and im not sure if a doctor in endocrinology completely understands what would happen when you change just a small element in the complete system. If there is such a AI that helps the doctors to make patients healthy again it would maybe also subect to attacks. So hopefully some doctors are hackers to. I dont know a lot about medicine, but when i asked @unibas if they had a look at the insulin pumps they recommend to their doctors and students they did not answer. That was a few years ago when CCC talked about such things.

Maybe "in the far future" we could be hypnotized one by a QR-Code since the Neuralink would dissociate one by a specific QR-code. Calling one insane or schizophrenic would maybe help to hide what they have done to him. On the back of the ccd Sensor you could even have a small LCD for triggering things. (Stimulus-Response-Habits). So if unsure about that, **CLOSE EYES WHEN TYPING PASSWORDS**. Even if a medic does permanent eyesight. So maybe not the best idea.
