

Infrared Ray Weapons maybe in every Display

Robot Teaching Mode

t22

<https://0x8.ch/HackersCardgame/>

Inventor: **xxxxx**

Year: ~???

If your Hand suddenly begins with small movements on the screen. (Écriture automatique, return channel mouse) they have already hacked your spinal cord implant (medulla spinalis) and they are testing if they can take over my telemetry. In my particular case they beat my hands against my own head (there are movies where autists do such things and there are special helmets for that). After they sucessfully attacked you they revictimize the scene (t10 card). And even if they havent killed me, it would influence me. Maybe this is how they killed Tobias Moser, m46. And for the equal stupid reasons and b1t1...

3D GAME-ENGINE (eg. CryEngine)

t23

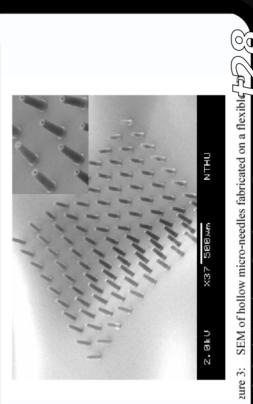

<https://0x8.ch/HackersCardgame/>

Inventor: **Silas Warner**

Year: ~1981

Castle Wolfenstein (Muse Software) was maybe not the first 3D Engine, but maybe it was the first enduser 3D Engine. Like a **SkinnerBOX** (t2 Card) but "innocently" wrapped as children's toy that uses **invasive** (eg t1 card) or **non-invasive** (eg t12, t8... Cards) technologies. Such games can be unidirectional or bidirectional (eg. b4 card). Similar to a network monitoring system possibly with Plug-INS, which are partially not even accessible by the user, or as a separate addon that just evaluates symbols in the game (evel1 card) or bigger things like **Quantum Inserts**, **Turbine**, **Tarnmill**, Game, fun, therapy or "therapy", game could also generate **psychological profiles** like **BIG5**, **Mayer-Biggs** or even **MMP12**. For example i bought a game, joined the server, saw the first enemy that had his back to me but i could not shoot him as a vegetarian.

Needle Array

t28

<https://0x8.ch/HackersCardgame/>

Inventor: **xxxxx**

Year: ~???

Elon Musk says we dont have enough bandwidth to the brain" but if you look at research like "micro needle array" then when you would see, that one could create massive parallel interface to the brain. We guess the design of Elon Musk's interface is completely bad and that he even knows that. That what Elon Musk shows in his shows about the Neuralink would just be some sort of Neuroexus Product that he possibly did not even develop himself. It would be very likely that Elon has already such an implant and is now producing a low-tec interface that would act as honey pot. We will send this interace to elon with the hashtag #Neuralink but we dont think that he will answer, maybe even filtered or he is being blackmailed by eg. the CIA....

Infrared Weapons maybe in every Display

t38

<https://0x8.ch/HackersCardgame/>

Inventor: **?????**

Year: ~???

In my opinion this terror attack against me uses the m123 card

- acid in my body lotion
- > seal the closest
- infrared laser
- > maybe in acer display, add polarization filter
- active denial system(s) that ross first layer of my skin
- maybe in combination with chemicals on my skin
- or chemicals that was put into my body lotion, or
- or even both (even 3 factors)
- > no solution yet

Physiker: 100 W netzteil reicht nicht 100W + Kondensator wurde entfernt

obfuscation, with chemnitodes, that stitches that seems to be placed in the skin / face too

Group Policies

t31

<https://0x8.ch/HackersCardgame/>

Inventor: **xxxxx**

Year: ~???

On Windows you can deploy group policies to a complete domain. People that are some sort of wannabe hitlers would enjoy it to impose their will upon others. I felt also cool when i was about 25 years old that i am the "Master" but in fact i was just the scapegoat. Not quite sure if those who deploy things like a16, m50.. to people or to a complete group of people are just older people that are using some similar software or if eg m50 card is deployed on all domains, eg the NSA/CIA/DSMS.

WIFI / Bluetooth or other beacon

t18

<https://0x8.ch/HackersCardgame/>

Inventor: **Heinrich Hertz**

Year: ~1930

(E.g. The Apple iBeacon is a radio bork or a radio buoy with memory and a small processor, Can be used to place virtual GeoCaches, but unfortunately could also to transmit a Suicide Death Bot (a16) to a Cell Phone, Computer, Neuronexus Implant, W02003055579 to activate the victim to a suicide or amok run, worst case "Nuke function" like Lemmings™ in 1990s.

Classical conditioning

t71

<https://0x8.ch/HackersCardgame/>

Inventor: **Iwan Petrowitsch Pawlow**

Year: ~1905

Step 1: Conditioning
eg. 1000 repetitions

$\text{Paw} \rightarrow \text{Bell}$

$\text{Bell} \rightarrow \text{Salivation}$

$\text{Paw} + \text{Bell} \rightarrow \text{Salivation}$

Step 2: (ab-)use
"Page", Aggression to Anok

$\text{Paw} + \text{Bell} \rightarrow \text{Aggression}$

Mathematical NOT

Active Denial System

t18

<https://0x8.ch/HackersCardgame/>

Inventor: **US Air Force**

Year: ~1980

The Active Denial System roasts the top layer of the skin at a distance of 500m. For a range of 5 m logically more than 100 x smaller, small enough to fit in a cell phone. Actually, 1930s electron tube technology, but today you can do this also with semiconductors (Esaki-Tunnel diode). Maybe one could do the same thing directly in the CPU with Army-Grade Crypto, since the radiation power reduces to the square of the distance, it would be quite small. The "Active Denial System" - denier would thus be the natural arch nemesis of a TinFoil-hat

People and Animals, to help and protect but unfortunately also electronic / psychological Warfare

t71
