

M-Com-Station

t25

Year: ~????

Inventor: xxxxx

Since 1950s are things like Stimoceiver (t1 card), so there must be a device that transmits and receives the signal from the Stimoceiver, or 70 Years later, it would be something like Neuralink (Elon Musk's Company). If the keys of an persons Neuralink would have been hacked or leaked, the person with the key and the strongest M-Com-Station could force the person do things he otherwise would not do (wrist case at t1 card) if the implant has even the ability to dissociate that person so that the person does not remember anything (you could call that Hypnosis) it would be stupid to sentence only the "Bot". Even if the "Bot" confessed that he has done the crime, case is not yet over. The person who owns the strongest M-Com-Station would still be free and maybe planning the next, murder, rape, amok... But in the real world, it would maybe look more than t26 card, tnx BBFC2 Honeypot

t16

Inventor: Romans

Year: ~500

Etimologically, the term police is derived from the Greek πόλις, polis "city". It referred to the entire public administration (today as "construction police" and "fire police") outside of Greece as the fashion word of the Romans. Maybe abused as Chessman of the authorities, and in many countries the police are the group of people who commit the most murders. See also "Americans 58 Times More Likely to Be Killed by Cops Than by Terrorists" Violence, riots, sometimes conflict rather escalating, often intimidating, biased often preserving only the power of the upper class, we should teach all cops Inductive reasoning (can you find the intentionally placed bug in m55 card?)

Stimoceiver

t1

RISK SCORE: 10

https://0x8.ch/HackersCardgame7

Inventor: José Manuel Rodriguez Delgado - 1950

The newest versions Neuralink(Elon Musk, maybe HoneyPot) read EEG data transmits signals to brain. Can activate certain functions in brain, wires in the Amygdala would probably cause aggressions (b1 card). Active community (read only, and non-invasive) on Twitter: @OpenBCI. Even things like directly "built-in" Augmented Reality (like PokemonGO) could be achieved with such technologies. There are maybe other ways lie detector (c02,m57,m77,m125,...) reads thoughts & emotions, influences emotions, automate/abuse victims. CryEngine / Unity (m8,m9,m13,m60,...) Warning, it seems that if you find sources about this sort of things they upload Porn or even Pedophilia Content to your computer and activate the judges or m37 card.. Additional Disassembly Protection for the group m46 first as shown as m41 over t1, then m37 -> m46 -> d1, so people could not integrate the existence of things like Stimoceiver in their world view, Matthaise:7::1

video not mentioning implants, question that, YouTube CIA Honeypot?

t3

Inventor: Romans

Year: ~500

Originally developed by Delgado, possibly been enhanced "in secrecy" since 70 Years, placed directly in the brain, and with software like OpenBCI and Deep Learning algorithms possibly recognizes even detailed thoughts. (see Neuralink, Elon Musk, HoneyPot) No matter how good the encryption would be, if wires are made out of metallic wires all such devices would be vulnerable to side-channel attacks [$f = \lambda / n$] if geometry if the wires are know and there is a transmitting device with enough power nearby. (unlike if t25 or t26 or both cards) I tweeted to Elon Musk asking what he is going to do about this vulnerability, but he did not answer so far. Maybe just HoneyPot for older technologies, and maybe Hashtags are filtered.

MRI/MRT

t20

Inventor: ???

https://0x8.ch/HackersCardgame7

To scan a human body, hopefully siemens does not have some sort of stuxnet virus here that filters implants and wires that were legally implemented. Algorithm would be some interpolating algorithm that removes the implant and shows normal brain. But unsure about that so far...

Implements which release chemical substances / drugs that can be triggered via remote control, e.g. Adrenaline metabolism-promoting substances aggression, in the case of melatonin metabolism sleepiness, influences victim's attention, but can also trigger the victim a suicide or to run amok. Medication but unfortunately also to activate a person as an #MKULTRA killer ("CyberWAR") or kill the victim remotely with Toxic substances. Today there maybe exists chemitrodes on molecular size.

WARNING, it is very likely to loose access codes of chemitrodes, and then the person that injected the chemitrode would be responsible for the death of the victim that died just because of a SIGNINT security problem

Loop Recorder
"Dormiphone"

t10

Inventor: Petron Corporation - 1933 - 1952

An analogue continuous tape, where one can record suggestions such as e.g. $2 + 2 = 5$, which is automatically activated at certain times. The tape will automatically turn off after 5 minutes. With digital Equipment (computer / mobile phone / IoT) one can realize more complex systems. And there are possibly also several different channels, (see cards t1, t3, t12)

During the night: overwrite things (c05 card) or learning things while sleeping, e.g. foreign languages, unfortunately you can also upload a complete (wrong) world view to the brain, or antagonizing world views or dogmas to split society into two groups that fight each other (see card m50, or eg. ma5 vs. ma6)

Inventor: José Manuel Rodriguez Delgado - 1950

t29

Inventor: ???

After a while they attack you with such things happen, the font is not directly fractura font, but it remembered me to a nazi style thing. I found this car by coincidence. Twitted about it then possibly Urs B. used sent the tweet to those people that then found me "coincidental" and hunted me down with Medulla Signalis implant. >> cAPI Insert Urs now transmits that because i wanted to kill claudine which is completely nonsense, i will never kill claudine, i would just kill myself if she broek the promises we gave us two. << the person just inserted the things in arrows, based on Jus Primae Noctis Rape is possibly the person that programmed this group of aledged Neo-Nazis.

PoliceCar (Stimulus-Reaction-Habit)

t16
