

Zombi/BOT Broadcast

m115

Year: ~???

Inventor: XXXXX
The Zombies or Bots seem to have some sort of **Broadcast Message** Function that makes them storm the place where the young people that don't want to sell their soul to satan are. Eg. in Shopping Malls, Parks, almost everywhere. The Zombies seem to dislike rain and are allegedly mostly Cyber-Raping kids during the night, so doing your bicycle rolls at night is (at least as a man) therefore a good idea. Broadcast message that works that good would imply that they trust their neuralink interface, because it leads them to "food". CC: OpDeathEater...

Escalation Algorithm

m174

Year: ~???

Inventor: XXXXX
I guess the PsyOP uses the **criminal code** (German: **Strafgesetzbuch**) for Psychological Warfare. Simplest way is that **he would sort the Articles by the length of sentences for a crime**. People would react differently if the sentence would be **one Year** or **twenty years**. Since **NSACIA** would have such Data and it is likely that the PsyOP has access to the **NSACIA/NDB Databases**, this would give some sort of an **expandable baton / Stick** (m7) for **Psychological Warfare**.

Escalation Stage Example:

1. Insult = some Money / Poor People more affected)
2. illegal Drugs = 0 - 7 Years
3. Theft = 0-5 Years
4. Pedophilia = 0-10 Years
5. manslaughter = >5 Years
6. Terrorism = 0-20 Years
7. Murderer = 15 Years - security custody (m46 Card)

thrunk the elephant

m4

Year: ~???

Inventor: XXXXX
The trunk of the elephant can be interpreted by other children (that maybe were abused by pedophile older people) as phallic symbol, so the Rape would be virtually revived again (revictimizing, maybe t1, t15, b1 and other cards involved) and the victim would then maybe hate the kid with Elephant Plush much more, than the initial pedophile offender, depending on the "exposure time" See Clark Huls Formula for Emotions. Maybe the reason why Stefan K. and Stefan W. threw Marcs Plush-Elephant out of the window from the 3rd floor in a Christian camp, when Marc Jr was about 14 Years old, but no details are known so far about this cases since both dont want to talk with Marc Jr. or it is censored on all communication paths.

confessional (to confess)

m131

Year: ~???

Inventor: XXXXX
We guess the NSA/CIA works with the principle of seduction. He gives the people the opportunity to get money if they sell their soul, or if they sell their soul just a little bit. With **BigData** and 100 Years of **DataRetention** they **would know about the smallest sin**. They used m66 Card as Scapegoat. One working hack to work around this principle is to confess what you have done. Me for example I drove drunken car and did other things, so i tried to turn myself in, but they said that this sins were expired. From that point in time the NSA/CIA System couldn't blackmail me with this sins anymore, unfortunately they then began to shoot against my sexual integrity. **Consumer Note:** Nun not included in all use cases.

"maybe" Personalized

They always tell you: "it's a fair game" but in fact it is not. I worked ~20 Years in the first market (Swiss terminology for working in non-disabled market). The average wage in Switzerland is 65'910\$. So I should have about 1Mio \$. Stalder hat mich angegriffen <- urs blum

Attacks that lead to the same problem or to the same result

m123

Year: ~???

Inventor: XXXXX
There seems to be a generic pattern the criminals use to keep things and attacks secret. They attack me with different attacks that all **lead to the same result**, if you try to prove Cause 1 then they bring facts why it must be Cause 2, so the different causes help each other to **keep all causes secret**. Not sure if a generic principle of secret services to keep things secret or criminals that are criminal since many decades and just trained to do attacks with such a dirty trick. But it would definitely imply that the people doing this is organized crime. So there would be some PsyOP or Master of this network, we guess this is "Dr" Pfisterer and Urs/Astrid is one of his terrorist teams. So it must be some sort of christian terrornetwork that uses NSA/CIA access codes....

Action Recognition luck detection

m128

Year: ~???

Inventor: XXXXX
If they have a 3D Model of your appartement, or your body and additional an EEG implant (Stimocceiver/Neuralink) that detects what stabilized your psyche and made you lucky the last 24h they have some sort of algorithm that loops all those scenes with an additional Pedophile 1960s Person that destroys this good scenes that stabilizes me. Maybe implemented as some sort of 3D Game that is created by the 1960s criminals and then given to a kid that plays it, so that the 1960s have an alibi.
