Eg. the flat-earth theory is just stupid, or maybe just a parable for Terry Pratchett's discworld novels, which tries to explain small and big kids in an understandable way, how a social system "university" works, and that some people trying to steal the boots of other magicians. Maybe it also describes how Mainframes (AIs) work, in this case the chained Octavo which contains 8 spells (access keys). Or e.g. The librarian (Google) who has been transformed into a monkey => see Google-Query: Porn

Maybe you should read Terry Pratchett's work...

They always tell you: "it's a fair game", but in fact it is not. I worked ~20 Years in the first market (Swiss terminology for working in non-disabled market). The average wage in Switzerland is 65'910\$. So i should have about 1Mio \$.

People often know, that if they say the **direct opposite** of the things they should not have done. As a 6 year old boy i already knew that if i say the direct opposite of what i have done then chances are big, that the parents will not think about that what i actually have done. **Kids fear the pain physical violence or psychological violence does to them, so it prefers to lie.** So it is also bad to throw with apples (in metaphysic manner sins) because children do not understand why this could make sense. When i was about 10 years i had to draw a refugee thing in school and i took a medium brush. The teacher saw that and told me (**sync**) why don't you take a thicker brush, so the 10 year old Marc went to the brushes and took a thicker brush... TRUE

Often the offenders say that they would attack me with weapons or things like a16 card. I guess they drove Tobias Moser to commit suicide with his weapon from the Army. I guess they first told the group that he was cyber-raping girls, the group agreed to kill him (m37 card). They did not ask me, but i would not have agreed. They also know that all those people that said no to kill him would later ask questions. Generic, later they asked me to agree to Kill Ruedi, i disagreed. My answer is "**not in our name!**" AND "**es gilt die Unschuldsvermutung**", since i say this about 100 times every day i guess they would like to make me a killer too. If played after m37 card this card is abused for **confess prevention and mindcontrol key** for the complete group.

There is a scene in Star Trek, where the federation tries to find frequencies of the borg hive, i don't like Star Trek because it are Military Dressed Soldiers that promote hierarchical systems, but this is a good scene. So if you would imagine, that many people already had some implants like neuralink, then that the process to find a user would be some sort similar to that Star Trek scene. In real world it would maybe more complicated, since it would be a many to many relation. Many sources, many sinks. Simple domain model: **If you would take analogue devices one could listen or easily inject things.** For example **If i would say: "I love you Claudine", Urs B. would inject "Sprengfallen gegen Marc Jr. Aktivieren"**, if he would do this with small bursts, it would be hard to deactivate that Termetework. **A big Problem would also be, if the are backup systems that are 99.9999% of the time silent, eg implemented as Autonomous System (Software).** Things concerning Tobias Moser (m37) seems to be such a backup trigger: CAPI::Moser loop ("Claudine betrayed you with moser" & t15...)

They burn a trauma into the victim's psyche, in order to be able to reactivate the trauma . In Rombachtal 11/13 there are so far **7 killings** maybe induced with technology, the owner Livit AG threw me out of the apartment as soon as i began to ask questions. Maybe they even ordered Jürg S. bullet hole to distract from the relevant scenes that would bring the assassin-mastermind into jail. Step two seems to be, that the killer bought the judge. If someone would find the "Surveillance" Infrastructure, and could proof that this surveillance does not just listen (eg. t1, t15 cards), the owner could not deny his complicity anymore. revictimizing of the bullet hole is done with a simple gun shot sound, over e.g. t1, t12... card
