An urban legend explains, that if you put monkeys into a room with bananas on top of a ladder and punish the whole group (**Behavioral Sciences**, **non-consensual**), if one of them wants to get a banana after 1000 repetitions the monkeys then would attack that monkey that tries to get a banana. If you project this behavior to **Foucaults Dispositiv** (see German Article: Interner Foucaults Theorie gesellschaftlicher Macht nimmt die Sexualität eine zentrale Position ein (<https://de.wikipedia.org/wiki/Sexualit%C3%A4tsdispositiv>) and would cause **pain to a group** if one of them touches wiener (for example in Big-Data, b1, t1, t1.2 cards) they would **attack the kid** that touched his wiener. The turtle comic (upper right corner) would imply, that this algorithm even crosses the line of generations. Crossing the line would cause the younger generation even to commit suicide since this socio-psychology-design-pattern then transmits pedophile parents that want rape the kids.

Some people tend to load real **Weapons** to the Game, so Game stops to be a **Game**. This is my **Scouts knife** that I got when i was a 14 years old boy. I used it as a toy and for woodwork. I never attacked someone. In Switzerland they changed the law, so this sort of tool is now declared as a weapon by law. I did not even know that i have this thing in a sealed wooden box. But when they put me the 7th time in a Mental institution the Police @kapo aargau searched all my stuff and found that Knife and have put it on my table in my 1 room appartement. Even when they knew that i am quite suicidal and that an **unknow Player** always plays a 16/13 card on me and that i was dozened times in emergency room & already one night on a ICU (Aarau). I destroyed the knife, but its not a **game** at all. In my opinion all Weapons should be destroyed globally. A **Weapon** is a "Konditionierende" to a **Relation** (s12). When they begin to make me crazy my father took my gun and brought it back to the Military. **Father, thank you for that.**

Also some sort of Limbic System Vulnerability Hack, our brain is susceptible to the cute appearance of children and reminds us of our (happy) childhood with equal aged kids. This is "is used" by advertising as well as by people like Epstein that possibly used the victims to get influence in politics, science... Scientifically spoken: It is about "Wahrnehmungspsychologie", the shape of the head, which also reminds us of our classmate in our childhood. Sociopaths Ignorantly dont care about childrens future, if they can sell more junk they would even roast a child (maybe "only" with an active denial system of course) if they just can make more profit.. this is a blue card with a kid, but the kids are the victims not those who abuse this principle.

With Weapon part 1 card they forced me to open my safe deposit box at UBS Aarau (The Police Officers Name: Michael R. & a Women dont remember name) They photos from the content of my deposit box, just as a "proof" that there are no weapons in my deposit box. In fact this was granted possibly by prosecuting attorney Marco Spr. of the Justizdepartement Aargau. So now Urs, Martin, Astrid, Pfisterer and the whole Canton of Aargau has all my data, and maybe they even used MY diary entry about Michael B. (Grosimörder Aarau) to drive (* cards) to him run Amok against his Grandmother. I was thinking Michael B. will commit suicide so i meet often with him to descaleate, but i could not when i was in the mental institution when Michael driven to run amok.

After the classic course through the gymnasium (n > 5 years) and about 10 years in a random university, one gets maybe a master's degree or the doctor's dignity. Requirements seems to be at least some random doctoral thesis in the field of study, and in Computer Science maybe Rank 50 in Battlefield BC2 is also required but unsure which of both is essential... (me mues die Rössli clöpf wo zied)

I guess there is some sort of electronic red pen where the offender can change things in text I wrote. The principle is quite simple. For example writing **TERROR*** all over the text and then additionally activating an Active Denial System / Amygdala one would not be able to read what the person who wrote the original text would like to say. Not tested so far. Workaround would be to use color. Your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick. Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold... Maybe this technology was one invented for good, to help children with grammar or orthography, bad people possibly use it for the contrary effect or to make important texts like protocols in criminal cases unreadable.

If you ask Google ADBL means "Ad Blocker" but maybe it has another meaning. But maybe it's for those who have the bad luck not to having own kids. But if you have kids people maybe would think you are pedophile. Important: make sure that the **comment** does not make your partner think you secretly married someone else and have kids with him or her. So only click that with equal aged, and only then when you are 100% sure that you are not pedophile and never will become pedophile, see cards m41, r45, m37 and a16 if a15 and the group would get dt1. But playing with only one equal aged sane and consensual with diapers maybe also helps to process things that went wrong in the (early) childhood.
