After the CIA most likely blew up the Twin Towers itself (maybe using t1 cards), George W. Bush declared accused countries media-effective to Terrorist-Countries (the Islamic areas are the oil-rich areas; source Prof. Dr. Danièle Ganser @Unibasel). In Western Media quite suggestive: "The War against Terror is only beginning" (**U76522qCxtk**)

The US army has begun to attack this countries of mostly innocent Muslims, their Women and their children. To expose such war crimes is dangerous as we seen in the case of Chelsea Manning, honor your **call Chelsea**. The weapon industry unfortunately has no mercy killing innocents for more profit and as far as I know Bush's family has a lot money in this "industry"

## Age Based Access Control

Normally **CISPP** books explain, that there are **Mandatory** and **Discretionary Access Control Systems**. Unfortunately the Person that implemented it for t1 card decided to give older People always more access rights than younger people. **Older people can access the younger people even if they are naked or otherwise vulnerable, so the CIA creates Acceptance for the Global Surveillance Nightmare**. This leads to (cyber-)rape, makes older people using younger boys as weapons and don't care about if they die, or would run amok during the "mission". Exactly those things led me to do things like m32 or m44 (but so she now is still there). If you look below the image in the m32 card (.svg) then you would see, that there are some victims that are much more affected than i. The Access System should based on moral & intelligence, since a morally intact intelligent person would not risk lives just to watch naked kids. See also m71 Card.

v. lat :: students "striving (after)" interested (for, striving for", plural: booze-up. **Socrates** (468 - 399 BC) "Once You start believing you are, you've stopped becoming" / maybe low self esteem driven because of Parents abused their power against their kids => the student has often to work for free, if he invents something great, often older takes it and sell it, and sometimes give credit instead they intimidate him with non-students or student haters (induced) so he forgets about the thing he has invented, discovered or made public already. Other Use Cases; Cleaning (woman, firefighter, work with dirty chemicals for cleaning up after a fire, older generation abuse the low self esteem they caused themselves students good & brave students everything or even begin to swear or threaten us.

Somehow they can detect when equal aged kids tell each other that they love each other. Natural Language Processing AI?

- unsure if jealousy
- drunken sadistic
- to make kids consume stuff they dont need to make slaves out of the kids with promising to put them back in their group of equal aged
- ???
- they seem to do this already with small kids (sk1 card) GRY for that!

## Turbo Scapegoat

In my opinion after every **Quantuminserts**, **TARMOL** "fishing crusade" the psychological CIA part of this software tries to make the people focus down the hierarchy, eg on the Scapegoat, that was attracted with a Cisco computer scholarship in 2002. I guess it are personally preferred Socio-Psychology design patterns, revictimizing things, even attacks me over spinal-cord implants, tries to drive me to take knife m32.m44, after such a attack, people seem to focus on scapegoat - hostage, often they pretend accusations and add [virtualreal] jury that judges [him/her]. It's like **they would throw a virtual hand grenade down to the younger on a regular basis**. \***CIA**: See Farbrausch Fr-036 which one should do, scapegoats have Informations! **Unknown**: we should detect that: +Eventtrigger: If kid (or 41 years old "kid") cries every 3h it's maybe subject to Psychiatry...

They always tell you: "it's a fair name" but in fact it is not. I worked 20 Years in the first market (Swiss) terminally for working in non-disabled market. The average wage in Switz and 65.910\$. So i should have about 1Mio \$. In fact i have goods in the worth 30.000€. I payed about twice the value of my 1.5 Room Apartment i lived in for 15 Years. After they took the money, they activated the caretaker that lived 10 years less there that attacked me and then told the homeowner, that i would have attacked him. The Police brought me to the Mental Institution Königsfelden in handcuffs, so i had no chance to go to court, then they told me, it's all >>> your own fault <<< you passed the deadline. The finishing move of the CIA will be to kill me to blackmail all that took my goods and to blackmail them the rest of their live, and of course this is also all my fault

In **Pirates of the Caribbean** 2 there is a scene where the lost pirates play for fewer years of service. This parable is promoted also in the real world. To quote Jack: **The law is in favour for an oppressor that is criminal**! For example a criminal or a pedophile father that rapes his daughter and uses eg. his son as a scapegoat. German: "Pechspulegung"). This way the criminal father would win time to do more crimes while the scapegoat would be naked to the justice system, would face prison, mental institution and wastes a lot of his time. **m72 card makes this quite easy for the older people**. We guess the CIA suggested the combination of m72 & m132 to all the older people and just a few could resist. The CIA owned people would get support by other simers and the CIA. With NSA BigData and 100 Years DataRetention it's easy to blackmail and abuse them (m14). System is autopoetic, except the younger people can prove it, then the real criminal would end up in prison with much more years of service. The old people would not hesitate to kill innocent whistleblowers (m46). Eg. the kids movie "casper" unfortunately even canonizes that. **So watchout for Parents that promote or even forces co4 card**. It's not a real crime but it is some sort of satans starter kit
