strapping psychiatric patients

m58

Inventor: **Satan**

Year: ~???

Mental institution strapping psychiatric patients. I could verify that in 2007 when they strapped me in Mental Institution Königsfelden, Aargau, Schweiz. The good people in mental institutions they tell that it's just that the patient does not commit suicide. But in fact it is mindcontrol and torture, see Sensory Deprivation. Worst case there are even shrinks that would rape strapped young female patients. If you google "Psycho-The-Rapist rapes patients" you would get 10'000 hits on google search. As we said on other cards, this normally just obfuscates technology cards like t1.28... the sad fact is that if a patient (no matter if male or female) would have been raped in a mental institution he or she will try to commit suicide the rest of his / her life. We did not find a way to fix that behavior.

The brain automatically says: pain / injuries are bad. The brain tries to prevent the pony from situations where it feels pain again, so the scene that caused PAIN will be burned into the longterm memory and in the future automatically avoided (avoidance behavior). Physical violence against children is prohibited by Swiss Law but unfortunately still very common. This effect is (ab)used in Behavioural "Sciences" = to boss people around for "efficiency" reasons instead of educating them. The consequences are often a PTSD that maybe can not be fixed at all. So it will continue to avoid the people that caused pain, but has probably no PTBS if it plays with equal aged Ponies.

If they want to make you believe in a lie they sent you eg. by Mail, Twitter or Facebook... there is some sort of pattern matching algorithm that then starts distributed over several channels Twitter, Google, Facebook, Mail...) making you believe in that lie. Since if your brain gets the same stimulus like the lie you initially got, it begins to feel comfortable with that lie and the possibility that i believe it is bigger. Here you see an example of an implementation with Jaro-Winkler algorithm, the same possibly works also with images, speech and videos. Such an algorithm would definitely imply a big player like CIA/NSA. btw: Great visual representation of Jaro Winkler by the way!

Sons have often problems with their fathers. Fathers often bully their sons, they abuse them, torture them, attack them (no matter if physically or verbally). After a while the son is old enough to defend himself, the justice system is normally not very interested in this things, but this causes the sons to become evil, maybe learned this behavior from their father, and are doing the same to younger people because they learned that it is "legitimate" to do this. In some cases then the father would punish the oldest son (son1) even more because he does the same to the younger son (son2), unsure if just reason to punish a weaker like the chief does or really wants to protect the youngest. (Bigger Domain Model: Money beats m72 Card, m72 card beats m6 or m6z2 card card, maybe in conjunction with m6 or m6z2 card This behavior (psychology, projection) then would be the normal case and would feed problems into the whole social systems (also m102 Karte) and finally hits also daughters too

Induced Depression

m23

Inventor: **Satan**

Year: ~???

Initially Many Social Systems have a Gypsy Cemetery. Maybe the one, that was just ignored or forgot by the group. Some older people use things like the m37 card and tell the group to judge the equal aged, then using dt1 card. Even if group said no to m37, and if someone from the older generation pushed that red button the group would still feel bad. An additional problem would be that the older selects the next scapegoat "to protect the group". The falsely accused equal aged would probably find out about that dirty "game". So you would have a transitive (math) situation where all the older people would have to attack the youngest asking [the right] to many] questions. It seems that if you ask the right questions, the alledged murderer plays multiple such cards. += Eventrigger

Weapon part 1

m51

Inventor: **xxxxx**

Year: ~???

Some people tend to load real Weapons to the Game, so Game stops to be a Game. This is my scouts knife that i got when i was a 14 years old boy. I used it as a toy and for woodwork. I never attacked someone. In Switzerland they changed the law, so this sort of tool is now declared as a weapon by law. I did not even knew that i have this thing in a sealed wooden box. But when they put me the 7th time in a Mental Institution the Police @kapo aarau searched all my stuff and found that Knife and have put it on my table in my 1 room appartement. Even when they knew that i am quite suicidal and that an unknown Player always plays a6/dt3 card on me and that was dozen times in emergency room & already one night on a ICU (Aarau). I destroyed the knife, but it's not a game at all. In my opinion all Weapons Should be destroyed globally. A Weapon is a "Konditionierende" to a Relation (s12). When i begin to make me crazy my father took my Gun and brought it back to the Military. Father, thank you for that.

induced "self injury"

m32

Inventor: **xxxxx**

Year: ~???

After a traumatic event like death of someone in family or after a rape (or just m38 card) people often show the behavior of "self injury". And if someone does self injury they can put him into a mental institution. In the mental institution he or she gets tons of "antipsychotics" that make stupid, lazy. If the victim is whistbleblower or whistble hacker that tries to show the public things that go wrong to fix those things putting the whistbleblower in a mental institution would be great for the offender. Maybe they tell even play m41 card to make the group think the self injury is because of them, finally playing the dt1 to blackmail and silence the whole group. Workaround: just have plastic knives in your household. There are victims that suffer much more (below my image) than i, if you know her, have a good hart and are medically gifted AND about the same age please help her.
