

## Cyber choking chain

t19

Inventor: ??????

With a golden wire / metallic substance that was injected into my throat they contract my muscles (possibly radio waves) that makes me paranoid. At the same time they loop the sentences "You have Cancer", "It's because you smoke" just to keep you save", "It's just a game". That confuses / depresses me. BBSM toy materializes later, possibly shields the radio waves, or revictimize me, or some sort of hint in case i would die. Copping Strategy would be if you think that it is just some sexual game, but in fact it is **illegal torture to silence whistleblowers / Whitewash Fakers**. Since I'm interested in the truth i am maybe on the right way to find those old people that destroyed so many lives. Unsure if this could be induced also by something like t1, t2 or t6 card. I guess they use EEG (eg t1, Card)

t2

## hiding data and evidence

Inventor: ??????

As a younger person one has almost no possibility to store evidence in a way the older criminals can not find or delete. Especially if you would have an **eye** card they would know where you hide things. But if you have for example a big library you could take an SD-Card (i dont trust SD-Cards) or an USB Stick and take of the housing, then you can put that in a book from a library. If you close your eyes and select a random book you dont even know by your own then it is stored and even you would have to search a while until you have the stick back, but the older criminals would have to search too. If they know about that, they maybe start to search too, but then you can prove that they are actively searching for evidence, so you can call the police and make your case.

t9

Inventor: XXXXX

If they know about that, they maybe start to search too, but then you can prove that they are actively searching for evidence, so you can call the police and make your case.

## Industrial Automation

Inventor: XXXXX

If a person has to do all day the same, it is likely that these moves are burnt into his psyche (not even an implant required) if you would give a stimulus (eg. high noise sound at 15kHz, 16kHz, 17kHz...) you could link this move to a stimulus, t2, t11, formula see m76 Card.

So it would be likely that not only people like me that worked in robotics (t22 Card) are affected.

It would be the same like m70 card or in combination with m70 card.

t9

Inventor: Fairlight CMI

To record and play sounds digitally (cards: c02, t10, t12) You can change pitch, bass, trebles, snip single words and glue them together like you want. It is also possible to use other mathematical models, e.g. Fourier analysis/transform to analyse the samples or to modify them. Simplest variant, if you play twice the same with delay of 0.2 seconds to achieve an echo effect. If you create a physical models of human voice you could even fade between 2 different voices (see t21 card) To make music, manipulate voice recordings prior to negotiation, behavioral sciences, e.g. The "Pavlovian Dog" experiment... but also a very cool kids toy.

## WOBBLER SWEEP GENERATOR

Inventor: XXXXX

Generates a sweep and then the echo of this sweep is evaluated to evaluate the whole system. More modern devices are being used in eg. docsis networks.

If you project this principle on wires/antennas that have been placed below the skin and eg. a webcam as return channel you could maybe even portscan humans or hijack their telemetry

Today we expect that digital technologies are used, but the old things maybe still up and running

t21

Inventor: JVC

Maybe directly built into the apartments walls, if you would play a **gun-shot sample** (see card m21) could drive the victim paranoid. Quadrophonic or even Octophonic in building with multiple floors would cause the mind to interpret the sounds as authentic and **make neighbours fight each other**

**Building ControlUnit with 1990 Technology:**

- 2x Gravis Ultrasound Stereo
- 2x Sound Blaster Stereo
- 4x LPT & JDAC / CENT\_DAC (see t9 card)

For Therapy (t22 Card). But unfortunately also to make people aggressive to force them to fight against each other. :)

## Skinner Box

t2

Inventor: B. Skinner

Over **electronics** on the floor, he could give the mouse **electroshocks = punishment / create aversion** By pressing the Button the mouse was rewarded with a **biscuit = reward / incentives** and **punishment**, to searched for sequences of **Incentives** and **punishment**, to completely "remotely control test-object" caused long-term damage. If you are being subject to such experiments talk about the details with **equal aged people** **You trust**. If you tell eg the Police they just diagnose you eg Schizophrenic and would put you in a mental institution where historically lot of such illegal human experiments were made, eg. Burghölzli. I guess today (2019) the abuse refugees, #WerdingerKinder, #SchwabenKinder, not loved Children (often the oldest male), Soldiers, ... generally people nobody cares about, we as a society should act and leak what we know about.

## Hardware Synthesizer Sampler

t9

Inventor: Fairlight CMI

To record and play sounds digitally (cards: c02, t10, t12) You can change pitch, bass, trebles, snip single words and glue them together like you want. It is also possible to use other mathematical models, e.g. Fourier analysis/transform to analyse the samples or to modify them. Simplest variant, if you play twice the same with delay of 0.2 seconds to achieve an echo effect. If you create a physical models of human voice you could even fade between 2 different voices (see t21 card) To make music, manipulate voice recordings prior to negotiation, behavioral sciences, e.g. The "Pavlovian Dog" experiment... but also a very cool kids toy.

## Quadrophonic

t8

Inventor: JVC

Maybe directly built into the apartments walls, if you would play a **gun-shot sample** (see card m21) could drive the victim paranoid. Quadrophonic or even Octophonic in building with multiple floors would cause the mind to interpret the sounds as authentic and **make neighbours fight each other**

**Building ControlUnit with 1990 Technology:**

- 2x Gravis Ultrasound Stereo
- 2x Sound Blaster Stereo
- 4x LPT & JDAC / CENT\_DAC (see t9 card)

For Therapy (t22 Card). But unfortunately also to make people aggressive to force them to fight against each other. :)

## Touring Coplete Avatar

t21

Inventor: ??????

With enough computational Power one could create avatars (speech synthesis / deep fakes) that are **"touring complete"** = Avatar that can do everything real person could also do. Initially they used samples but one would find out if they use the same sample over and over again. Sociology design patterns with multiple touring complete Avatars. **one even could simulate complete real-live situations**. You can never be sure if person you hear on eg Stimmcooler (USe477027) is really the person/group you are talking with. So best thing is to meet face to face (then they abuse this technology too but if you know this person well they would possibly find out). **Touring Complete avatars not just simply exist, they had to be generated by unknown**. If one knows to much about this sort of technology it would be likely that they create **avatars for the people** **knows and trusts, like Family or near friends**.
