

## Mirror Jury

<https://0x8.ch/HackersCardgame7>

**m37**

**Inventor: Satan**

**Year: ~???**

The TV-Series "Bull" just obfuscates this. Mirror jury represented by a mirror ball would mean to **motivate young people to judge an equal aged kid**. Worst thing that could happen is that this equal aged kid runs amok or commit suicide. Since the whole group **said yes to judge that equal aged kid**, the whole group would feel guilty. dt1 card and therefore need more **(illegal) drugs**. Situations can differ: on the computer, during a party, during sex... but if the (falsely) accused survives, there will be a **part 2**. (see fr-093 with **a15 card**). If only one single equal aged says **No** to kill that equal aged the older generation has one big problem: **The One** that did not vote to kill will ask lots of relevant questions that will maybe prove the innocence of the group of equal aged "judges". **Maybe the same as human como sacrifice, killing by parent generation...repeated, over three equal aged**. People like the m37 card until dt1 was played. They like because they are once not the person being sued that did not "cool judge that is morally better. Origins of this behavior maybe comes from the childhood and beeing part of a Group

## Suicide Death Bot infection path

<https://0x8.ch/HackersCardgame7>

**m62**

**Inventor: XXXXX**

**Year: ~???**

They seem to play this card only if one have hardly any money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t1... they say that a suicide death bot was transfer to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround i found was to throw this food away**. I guess this is how they trigger poor people or homeless people. The victim of this cyberattack would then maybe attack the person that transferred that malware. (m50 Card). Often this sort of Malware spreads to your whole existence and to many of the scenes and objects you own. I heard they use same sort of malware eg. on **womans underpants**. We should transfer the malware back to the person who transferred it; **but uneducated person would run amok**.

## Submissive Pet

<https://0x8.ch/HackersCardgame7>

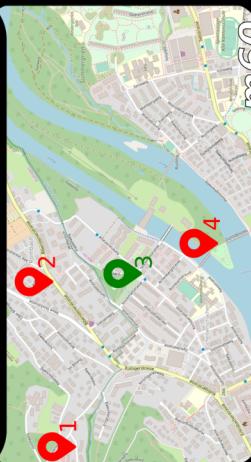

**m29**

**Inventor: XXXXX**

**Year: ~???**

Like a plush: to hug, pet and care for but more interactive. Clinical use: as a coping strategy, e.g. you can buy a shy cat for a scared child, which then helps the child to analyze his fears without focussing directly on his own fears, that then might lead to a cognitive dissonance & avoidance behavior instead of analyzing the things that caused the fear As an ally but unfortunately also by some to mistreat (Anonymous => Case Dusty; where I would expect that Kenny "learned" violence eg. from his father, so in worst case Kenny is a victim too, and if Anonymous would have beaten the shit out of him then someone maybe wants to play a dt1 card to the whole anonymous crew, unsure so far)

## Location Based Psycho Terror / Psy-CyberWar

<https://0x8.ch/HackersCardgame7>

**m60**

**Inventor: Satan**

**Year: ~???**

One can program events based on the coordinates of the victims. For example if i would be near **1** the annoying janitor would be activated (\*+ cards) and even attack me. Or if i would be near **2** lot of cars pass by, **lot of stupid males that let the engines howl** must know your **normal route** and the **average speed** you have with your bicycle. It could also be used for good things, for example at **3** there would always be a lot of 20 years old that smile friendly at you. Anybody added me just the red scenes. It is also dynamic, so the "design pattern" eg. number 1 for example could even follow me, making me paranoid. So it's more of a evil design pattern that hunts me and after a while one gets completely nuts.

## "fair" "Game"

<https://0x8.ch/HackersCardgame7>

**m66**

**Inventor: XXXXX**

**Year: ~???**

Its all the fault of the victim << or the fault of the kid >>**but definitely the mothers fault**<< There are (Mothers/Vathers) that force their (daughter|sons) to eat from the forbidden tree. There are also Parents that dont feel guilty, so they would not have reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum as jewish scapegoat. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80). So the CIA brought him to the Mental Institution Konigsfelden in handcuffs, so i had no chance to go to court, then they told me, it's all >> your own fault << you passed the deadline. The Finishing move of the CIA will be to blackmail all that took my goods and to blackmail them the rest of their live, and of course this is also all my fault

## Anti-Psychotics Part 2

<https://0x8.ch/HackersCardgame7>

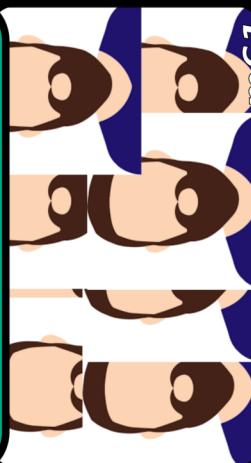

**m49**

**Inventor: XXXXX**

**Year: ~???**

Some Mental Institutions give young adults or even kids drugs that make them stupid and happy. (Part 1) And with Technology Cards (eg t1 or t2 years newer technology) they then (ab)use them to infiltrate dangerous systems (Part 2), for example companies that are using or selling illegal drugs. The "antipsychotics" makes the kid stupid, lucky ignorant and would cause the kid to make fun about the people in question. So the company or chief in question would tend to hate and attack the young adult. See Human Rights, Law. **Don't do such things, the chance is quite high that if the company does illegal things would kill the young adult!!**

## Touring Complete Victim

<https://0x8.ch/HackersCardgame7>

**m61**

**Inventor: Satan**

**Year: ~???**

One could create a touring complete avatar of the victim or the scapegoat and every time when the jury or his social system would of equal aged would listen to him and begin to believe that he is just the scapegoat, the victims / scapegoats touring complete **avatar would start to insult, intimidate the jury or social group**, so the group of equal aged would stop listen to him or even begin to **attack him**, This card seems to extends the m37 card -> dt1 card. Technically it would be samples of earlier scenes when the victim or scapegoat **was tortured** and he said things he maybe just repeated (**rawhammer attack of the mind, co2 card**). This would give quite a lot of work to create such a scene in NSA/CIA Data Retention. **So we question the honesty of the universities where Jake learned and teached.**
