Reproduction (therefore sex) was vital for preservation of the species. This early Part of brain has influence to individuals. If your NeoCortex doesn't know about Vulnerability, they can easily psycho-backdoor you, for example sell overpriced cars by simply putting a half naked women on top of car (eg t1 card: "The woman ins inclusive") limbic system, is responsible for processing emotions & instinctive behavior. **Sexualität dispositiv** (Michael Foucault) Can drive people to do things they would normally not do. A healthy and consensual sexual life is maybe even good for the Endocrine System. The old people play such cards (and obfuscate with mos2) mainly to obfuscate technology cards, especially if we find prove that would bring the older to jail. **Websites like Youporn should only allow kosher (BDSM-)Porn, one could implement that with initial scene where the slave agrees with what will happen and a scene after the act where she / he says that everything is ok.**

Every Morning when I stand up there are new loop-recorder patterns and RU-Card Patterns played in my appartement (with eg t19), they try to overlay what i say yesterday, my imperatives, my maximes, they would like to destroy my world view to feel less guilty? The PsyOp let the 1960s do sins and told them that ok, but we can show, that they are not only killing autistic people, so they rewrite what I said the day before for not feeling that bad, unknown: they even pay for Antagonizing worldviews. I question myself why they don't just leave us alone? unknown: **warning to all the honest sheeps, they want to make you guilty too (girls mos2, boys rage and mos3).** I mean the circumstance that they are using manipulative techniques would imply that they know they are wrong, maybe they just protect the kids they rape or want to make them rape younger too for not feeling to guilty, dogmenraum, illegal paedo snowball system, a sin you swallow for the rest of your live, freshmeat

Patients that takes their drugs tend to be normal people only information that causes euphoria and filter that information that would cause psychological pain. Technically this would be quite simple. For example writing **TERROR*** all over the text and then additionally activating an Active Denial System / Amygdala one would not be able to read what the person who would save lifes if people would confess and atone. Snobish overate one single bit of truth about their sins would cause rage and even make the sinners run amok. **This is a military thing**. In Boy Scouts Arau where many armed Officers have grown up the Shrink can pop the all the "bad trips" by using his voice-key "Spontane Entlading" and people like Urs B. would run amok overwhelm by the facts order the same system as they have here in Königsfelden to temper with... worst case it's not a default System and has unknown add ons, in that case I guess in the Workshop Königsfelden to temper with... worst case it's not a default System and has unknown add ons, in that case I guess in the Workshop near the railways, they maybe have some unused parts...

The Psychiatrists tend to give normal people only information that causes euphoria and filter that information that would cause psychological pain. Technically this would be quite simple. Cyber red pen

I guess there is some sort of electronic red pen where the offender can change things in text I wrote. The principle is quite simple. For example writing **TERROR*** all over the text and then additionally activating an Active Denial System / Amygdala one would not be able to read what the person who wrote the original text be to say. Not tested so far. Workaround would be to use color. Your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick. Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold... Maybe this technology was one invented for good, to help children in grammar or orthography, bad people possibly use it for the contrary effect or to make important texts like protocols in criminal cases unreadable.

Skinner-BOX & leben(er), Part 2

IMHO, **cars** are **Skinner-BOXes** too. A lot of electronic Equipment in a car. People that uses a Car are being programmed while **driving**, this is suboptimal anyway. So we need to declare all Car Drivers to **MKULTRA Killers** as long one can not prove that he is not. Urs B. knew about that, he said in 2002: "All Cars with Antennas are remote controlled" This would mean since he kept this secret he is partially responsible for all People died in Car Accidents. He used this knowledge to show-off "his greatness" to his daughter but not to save the victims. **MKULTRA's world Card**. So the Term "**Car Hacking**" is also an overloaded Symbol. Technically it would be some interface the user that uses the MKULTRA would not know, t1... Card and eg some personalized map where the MKULTRA Bot would get the **Stimulus: Go to place 23. My Father sold my car, i feel better now and it's much better because of CO2.**
