Räumlich kann man Antennenformen unterscheiden durch ihre Strahlgänge in Viefachen oder Bruchteilen der Wellenlänge λ (griechischer Buchstabe Lambda):

Die Frequenz von Antennen kann man berechnen, bzw. allenfalls würde auch ein Gold-Draht z.B. im Körper allenfalls eine Auswirkung haben auf das Nervensystem / Muskel. I legitim wäre aber nur das Selbstexperiment und dies nur in nur in Anwesenheit eines Medizin Professors bzw. eines Doktors in Medizin. Menschen die solches Missbrauchen würden ev. eine falsche Spur legen und behaupten es sei wegen Chemikalien / Medikamenten / Drogen

Multiple Sensors

Inventor: xXXXXX
<https://nactacy.com/2017/05/19/sense-all-the-things-with-a-synthetic-sensor> This Sensor can detect light, Infrared, Electromagnetism (x,y,z), Temperature, Sound.... and it has synthetic sensor (calculated dyn/dt) those things will then matched to a matrix of learned events. So it can detect for example that you enabled the microwave oven (Electromagnetism & Sound of the fan that cools down the magnetron). unfortunately Satan can also detect if a innocent girl uses her private epilator. If it is enabled and disabled over a period more than 10 minutes. Most likely they then add pedophile old people to his stream and sell her or both non-consensually as bitches. This would lead to avoidance behavior for body-care and in Switzerland they could you put in a Mental institution for neglect Swiss: ZGB Art. 426. They changed that now and try to hack medulla spinalis implant on this event, pedophile people like Urs, astrid and Pfisterer obfuscate hacking attack to kill innocent boys and girls.

There seems to be a digital LoopRecorder where people add **Symmetrisch** **komplexe** **Repetitions** **objekte** join to the loop with junk problems, reidentifying of things they **already** **know**, **otherwise** **they** **would** **we** **also** **not** **see** **them** **in** **their** **illustrations** or to fix **broken** **superior** **race**. Tunnel / ESAKI Diode

Inventor: Leo Esaki
Year: ~1957

A tunnel diode or Esaki diode is a type of semiconductor that is capable of very fast operation, operates in microwave frequencies, quantum mechanical effect called tunneling.

Like an Electron Tube, to create High Frequencies / Oscillators. One could maybe integrate his also in CPU's or other electronic components.

Cavity magnetron

e2

Inventor: [H. Gerdien](https://0x8.ch/HackersCardgame/7)

Year: -1910

The cavity magnetron is a high-powered vacuum tube that generates microwaves using the interaction of a stream of electrons with a magnetic field while moving past a series of open metal cavities (cavity resonators). Electrons pass by the openings to these cavities and cause radio waves to oscillate within, similar to the way a guitar resonates sound from its sound box via the oscillation of its strings. see also t15 card

Infrared Ray Weapons maybe in every Display

<https://0x8.ch/HackersCardgame7>

Inventor: **?????**

Year: **?????**

It seems that the NSA/CIA Terrorists Urs Blum and Hanslburg Pfisterer Araau have Activated some sort of infrared weapon on my display, that causes pain in my eyes and makes my face skin red. After I found out the loosed streams with false evidence. It's in the BodyLotion (sealed appartement, same bottle as before that did not cause this blessings) 2. it's because you eat eyes that tested the face cream on 3 small places, the face that was not in contact with the cream got red 3. Claudine B. would have put acid in my body (????) 4. the swiss army would have installed an infrared laser (closed roller blinds and closed curtains) they added multiple cocaine consuming death circles into my m98. m99 to make me believe that, maybe paid by acer to obfuscate the Infrared Ray weapon they put in kids toys. My death in the garden of those who did this to me would be an acceptable price to prevent people from putting (cyber) weapons into kids toys. Point 3.1m not 0.00% with col2, S& 337 would be possible i guess, since i seal my apartment, even when i'm in my apartment.

Physiker: 100 W neutral reicht nicht
Physiker: 100W + Kondensator würde reichen!

A close-up photograph of a vintage vacuum tube. The tube is made of glass with a dark base and a light-colored, ribbed top section. Inside, a glowing filament is visible at the bottom, emitting a bright light that creates a purple glow around it. The tube is mounted on a metal chassis with various electronic components and wires visible in the background.
