

Spinal Cord Implant

t6

Year: ~???

Inventor: xxxxx

Originally an implant in the spinal cord (medulla spinalis) that could force an orgasm << (they talk explicitly about "sexual things" to make the people focus on that (m107 Card) and to obfuscate that the whole body can be remote controlled by such technology), patented 40 Years later in 1999 under US6169924. Today maybe encased with more than just that "wire" (US Army researches in this field). Output; the victim can be "used" as a robot / soldier / killer or sex slave with a 3D model of the victim in a 3D environment like games if all people would have such thing they could create a weapon out of such technology and unfortunately kill billions in a few seconds. Hopefully those who created this system considered that vulnerability. Mobile phone could act as Uplink to a mainframe (the US Army maybe uses the Cry-Engine with PhysX for the "Simulation")

RISK SCORE: 10

Loop Recorder Part 3

Year: ~???

Inventor: xxxxx

Like t10 or t23 a game engine (here Blender 3D) is also some sort of t7 Card, but it's not just a loop it are more event-triggers (t14) or state machines (coil), for example if I leak about this sort of things a16 card is being activated against me. They often use an event in real live to create this story, you would focus on the initial scene and the person instead of technology. And possibly with AI / Deep Learning (a11 card) prerendered AI or genetic algorithm that learns. The card is in neutral gray, because you could use such technology also for good things but in my case they abused it more like weapon or "white" torture against me, that wants to kill. Book Erebos the algorithm would maybe also try to isolate whistelblowers and whitehats that could be as simple like an inverted F=TV5 Card (Alex Wissner Gross) formula, not keeping all people connected but isolate some or even all.

(Cyber-) Isolation Cell Padded Cell

Inventor: Allan H. Frey (Cornell Uni)

"He Hears non-existent voices, hahaha", invisible communication channels, poised microwaves received directly by the cochlea. The exact frequency found by scanning through the possible frequencies. If the victim puts his hand to his ear ("tingitus"); Automatic Behavior Response". Was 30 years not patented until 1989 under US4877027. Technically it would have been possible to do this maybe already with electron tubes (~ 1900).

Psychological Perspective: people that abuse such technology would keep that secret and previously labeled as a "schizophrenic" the victim is completely defenseless and it is likely they induced suicide or amok. In combination with e.g. a loop recorder, see also c02 Card, the perpetrators often caused permanent damage in the psyche of their victims; PTSD (#Verdingkinder / #Schwabenkind / #Slaves)

If Jurisdictions use 3D Models for surveillance of accused people one should check the device and the supplier. If NSA/CIA uses Scaregoats for things they have done they would suggest local Jurisdictions to do this sort of surveillance, but the device and infrastructure would be owned by the CIA/NSA to make the local Jurisdiction believe that the Scaregoat is really the criminal. First Problem would be that the real criminal is still free and planning maybe already the next Crime and secondly the Scaregoat would then driven to commit suicide and the Jurisdiction could only say: "It is fair that the Criminal died" but they would know that m37 -> dt1 Card.

Antenna (Wasserflue)

t26

Year: ~???

Inventor: xxxxx

As seen in Battle Filed Bad Company 2, the m-com station is shown as small box, but it would be more likely that these are big antennas like the one on the "Wasserflue" (in Küttigen near Aarau) Maybe one should find out the power the antenna uses and how strong the "drum-antennas" are and if it would be enough power to activate implants (maybe just a golden wire with lambda (other Antenna card) to drive people insane or even drive tobias moser to commit suicide with his military weapon (as far as we heard))

ICD10 - F44.X Chess Clock

t37

Year: ???

Inventor: xxxxx

IMO there's sort of Cyber Mainframe Chess Clock that puts people into dissociation state, makes them blind for certain things or people, even if would live in same appartement. Technically one could implement that with "Behavioral Sciences" also known as Torture. If you cause strong PAIN (see microdot below image) as soon as the one you love is in sight (eye1 card), maybe linked to an additional Stimulus (acoustic, visually, implants...) things or people might be invisible <insert> for the person that should not have read the PAIN diskmag</insert>. **Worst case:** "Used" to rape young boys & girls; **best case:** helps to GUARD the world, since we don't know expect the worst; I don't have prove yet, but there was a two seconds scene i can remember in mental institution, where she stood in front of me and was on my knee having "some" pain, as soon as i have prove or hacked it with the microdot i will maybe create a card in hackers card game, unsure if hack would be blue or red team

Glass Sphere

Thanks to the guy who has drawn this, i really like that image. Look at the a14 card. I don't think that all witches are black, there are maybe also Fortune tellers, occultists, esoterics, fairies, trolls, non-medical practitioners, Satanists? ... So bricking all the spears would maybe cause more problems than it would fix.

But giving the good ones that are not older than 1978 some cards could maybe help to find out if he / she / it joined the dark side or not.
