Inventor: Trevor "Hacker" Kay

Year: ~1993

Each (sub-)culture has its, heroes, enemies, rites, symbols and "secrets" Trevor Paglen "collected" such symbols and wrote a book: **"I Could Tell You But Then You Would Have to Be Destroyed By Me"**: Embriols from the Pentagon's "Black World": Find those symbols of common sense and you will find maybe hints to the truth and the whole picture. I'm not sure if such symbols are "the Mark of Cain" or symbolize just a group membership in the real world, or in computergames. But being member of a bigger system maybe compensates also low self-esteem. question would be, who caused the low self-esteem initially

Inventor: Satan / Romans?

Year: ~1990

People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and began early to question things the older generation said. This way I went is possibly more painful since you must defend against the older generation and consider that the younger that help those olders and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

$F = T \nabla S_r$ Equation for intelligence

In my opinion hierarchical systems are bad (a13) so there would be alternatives, for example the equation you see in the title. For example this algorithm would provide that no sheep gets lost (m8) if one would implement it in society, social systems, facebook, twitter... I studied Computer Science some years but for me it is too complicated to implement it. Source: https://www.youtube.com/watch?v=ue2ZEmTj_Xo https://www.ted.com/talks/alex_wissner_gross_a_new_equation_for_intelligenceReally_great_work, but maybe you should work on your Entertaining Skills and see a fashion consultant, but i've only seen this one video, maybe i'm wrong.

Language Level Detection (nasty filter rule)

Irre Antwort ist bedeutungslos. Wir registrieren, berechnen und ziehen unsere Schlussfolgerungen.

If you have something like google glasses, a retina-CCD Chip one could easily enumerate and footprint the psyche the soul of the victim, if you would have at least 2 RFID chips on your head, or easier two LC-Circuits on your head and a 3D model of the room, one could create such a profile.

I make this card neutral, because it could be used for good and also for bad. Worst case they use such things to create at cards...

Algorithm on my "computer" when i try to do things, to fix things, to finish relevant business. There are problems like extending pant-usb with df1k2 where unknown starts an algorithm, that prevents me from solving the problem. The algorithm starts tons of new problems that are also relevant, i try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a suicide death bid (a16) against me. Prevents that problems are finally being solved. There are some sort of "resonators" (Ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just other people that are being activated. If these are just people they are maybe being activated with BioData from the NSA / CIA Data Retention System that would prove earthen sins of this human? "Bois". Mathematically spoken possibly partially transitive, t1... transmuts now **this is non-solvable problem, hahaha!** (= psychological warfare)

There are algorithms to find out about the language level of the person who wrote that text. For example if the text was written by a **second grade student** or by a **language professor**. It seems that satan took this algorithm and used it as filter algorithm that filters communication above a specific language level. For example for **filtering communication over t1 or t12 card**. This would have effect that especially intelligent people would be handicapped in "unseen university" (Terry Pratchett) while the less educated people would have no problems to communicate with each other. Unsure if bug or feature (preventing m40 card). But in a fair world all or none should have that filter. But it definitely wastes our time and makes us crazy and low self-esteem...
