

Stanford prison "experiment"  
antagonizing  
situation / medication

<https://0x8.ch/HackersCardgame/>

**m50**

**Inventor: ??????**

**Year: ??????**  
One can produce situations, where people are played off against each other. You could do this with drugs, for example giving one person chemicals that make happy and funny and the other person chemicals that make sad. Worst case both victims will begin to fight each other while both victims think that he or she does the right thing. Maybe such chemicals were involved in Stanford prison experiment, unsure. But with Technology cards (eg. t1...) you could possibly produce similar situations. Or in Politics, race, gender, Nazi « jews... » or with just showing good or bad Facebook content (facebook experiment, see Internet). For example also to tell some people that the accused young boy is guilty and therefore it would be "legitimate" that an older person takes his goods would create the same situation, the unjust decision is often in favour of the stronger like Urs B. that has weapons... **NOTICE INSENTHIR0.**

Limbic System  
Vulnerability

<https://0x8.ch/HackersCardgame/>

**m15-mod**

**Inventor: Satan / Capitalism / Advertising Industry**

**Year: ~????**  
Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neanderthals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, kids slides. This is used by advertising industry, but also "used" for imposing your will upon others. Michael Foucault: "Human body and the human disposition in terms of the priority of sexual desire" (Euphemism) A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SSC BDSM card and ignore resulting consequences. m38 -> c01 & t1 & b1 -> m32 -> a16 -> m37 -> dt1

Intentionally  
diagnosing Schizophrenia  
instead of Autism

Soldiers of The One

<https://0x8.ch/HackersCardgame/>

**m135**

**Inventor: XXXXX**

**Year: ~????**  
Autistic people tend to be gifted in electronics, computer stuff, computer science, algorithms... "maybe" **some big intelligence agencies** did not want people to find out what is going on. So they tried to find out early who is autistic (for example by tracking the **book stores** and who is buying an **assembly book**) by the age of 14) and then those people ("possibly" shrinks) in question gave the parents of the autistic child intentionally false advice; said them things like "**We should give them LSD to heal him**" or "**we should diagnose him**". **Schizophrenia Spratext**". In fact the technical system they don't want the people to know about would just activate b1 card as soon someone would talk about that, so the autistic person is "sane" if he does not warn the other people that the other people are betrayed by that system the "Architect" does not want the people talk about.

RAPIST TERRORIST

<https://0x8.ch/HackersCardgame/>

**m41**

**Inventor: XXXXX**

**Year: ~????**  
1. they **declare** you to a **Rapist** or to a **terrorist**  
2. say the small wannabe Hitler in your quarters that you raped a girl, even when you have not  
3. the annebe Hitler attacks you physically and calls the police and says them to put you in a mental institution. The offender was a fan in Rombachthal 13. Beware of him. I will remove this Name when the pictures are back AD and Livit AG told the Police what they have done to me. Increased the PRBS of the Whitehack Hacker / Whistleblower. Generated reason to put the whitewhat into a mental institution or bugging him with m37. Dehumanized, so bad people think it would be legitimate to do human experiments with the victim. Worst case the old generation created the 20 years old "Rapist, Terrorist" to get rid of whitehats and spam feminism, but not yet sure about that. It gives the group that judges him a meaning in life, and to defend against that would waste his time -> dt1 card unknown: and it would be likely that eg. the vather of his girl is (Cyber-)Pedophile, so this is maybe a scg card too.

Automated Mindmap  
Generation with Image  
input and EEG return path

<https://0x8.ch/HackersCardgame/>

**m178**

**Inventor: XXXXX**

**Year: ~????**  
this is then used to create a personalized Suicide Death Bot

Bitching  
durch Blums

<https://0x8.ch/HackersCardgame/>

**m148**

**Inventor: Satan**

**Year: ~????**  
After Family Bloom attracted me with a computer course (m75), after her daughter (m38, m83) took my heart, after they thrown me out (m45), after they put me in a mental institution (m19), after I worked for 18 Years most of the time 16, not just 8h like normal people do, after they used me for many things as scapegoat (scg), after they used me also as lab rat (t19, t11, t15)...

Overload operators  
methods and symbols

<https://0x8.ch/HackersCardgame/>

**m69**

**Inventor: XXXXX**

**Year: ~????**  
Overloading is possible in some programming languages. I use this as metaphor for one could also do with such a feature.

QUESTION EVERYTHING?

<https://0x8.ch/HackersCardgame/>

**m70**

**Inventor: XXXXX**

**Year: ~????**  
Overloading is possible in some programming languages. I use this as metaphor for one could also do with such a feature.

For example the above "WHY?" could mean:  
I agree, I question everything even this "Question Everything".  
**But you it could also mean:**

Why should i care and question things, i want to become or stay an old fat hairy ugly ignorant pedophile person

In programming for example the calling function would decide what "stream" on gets over an technology card, in real world you could implement that with RFID, HandyID, face recognition....

<https://0x8.ch/HackersCardgame/>

**m77**

**Inventor: XXXXX**

**Year: ~????**  
with Neurosky MindWave, you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter **faith**. This card was added after leaked m57 Card.. There seems to be an algorithm, that records what one is doing example during a week, saves the good scenes and then tries to create a Suicide Death Bot with this inverted good scenes.

Additionally they seem to drop all connections from the victims t1 to other allies, so no-one could help.  
Workaround: Listen to music you love, I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for the detection algorithms to identify your emotions.
