

pituitary gland or hypophysis

b2
<https://0x8.ch/HackersCardgame7>

Inventor: God

Year: B.C.
In vertebrate anatomy, the pituitary gland, or hypophysis, is an endocrine gland about the size of a pea and weighing 0.5 grams (0.018 oz) in humans. It is a protrusion off the bottom of the hypothalamus at the base of the brain. Hormones secreted from the pituitary gland help to control growth, blood pressure, energy management, all functions of the sex organs, thyroid glands and metabolism as well as some aspects of pregnancy, childbirth, breastfeeding, water/salt concentration at the kidneys, temperature regulation and pain relief.

AMYGDALA

b1
<https://0x8.ch/HackersCardgame7>

Inventor: God

Year: B.C.
The amygdala also corpus amygdaloideum; Latin, from Greek ἀμυγδαλῆ, is one of two almond-shaped groups of nuclei located deep and medially within the temporal lobes of the brain in complex vertebrates, including humans. Shown in research to perform a primary role in the processing of memory, decision-making, and emotional reactions, the amygdala are considered part of the limbic system, **NOT VERIFIED BY ME SO FAR!!!**

Development / processing of anxiety, fear and anger, "fight or flight" - understanding or manipulating reaction, "rage", possibly

NUCLEUS ACCUMBENS

b3
<https://0x8.ch/HackersCardgame7>

Inventor: God

Year: B.C.
The nucleus accumbens (NAC or NAcc), also known as the accumbens nucleus, or formerly as the nucleus accumbens septi (Latin for nucleus adjacent to the septum) is a region in the basal forebrain rostral to the preoptic area of the hypothalamus. The nucleus accumbens plays a lesser role in processing fear (a form of aversion), impulsivity, and the placebo effect. It is involved in the encoding of new motor programs as well. Not sure if this text from en Wikipedia is correct, having a medic for that would be great.

EEG / FLASH QFIRE?

b4

Inventor: Satan

Year: ~1900?
I did not find any image from such a device. In Psychiatrie Königsteinen (P4) there is an EEG installation. They measure your EEG with electrodes and in the same time it produces flashlights with a stroboscope. **The flashlight cause peaks on the EEG!** Unsure if that was "service" of the mental institution and they just tried to find out my perceptual threshold. The problem was that someone used this scene on the street or in my car and also flashed me, that revictimized the scene in the Mental institution and made me massive paranoid. I dont knwo if psychological terror on the street was intentional or if this was that just that eg the CIA stole the data and abused it against me. Question would be, what could one do with massive blade-server && IEEE1398, eg. t1 card and a technician party where many young people go to.

Maybe "in the far future" we could be hypnotized by a QR code. Calling one insane or schizophrenic would maybe help to hide what they have done to him. On the back of the ccd Sensor you could even have a small LCD for triggering things. (Stimulus-Response-Habits). So if unsure about that, **CLOSE EYES WHEN TYPING PASSWORDS**. Even if a medic does such things in hospital and sterile environment, you could loose permanently eyesight. **So maybe not the best idea.** Workaround for hacked Retinaccd would be to jam the frequencies used by the Retinaccd. Another thing would be to find eye entral Server (**CCIA(NSA?)**), then one could prove that this system is **bidirectional**, that they stalked Marc Jr since he was a 13 years boy old in Kara Bez (Écriture automatique). The cams that were installed by Alinag AG would therefore be the scapegoats that distracts from this card, and that eg. INSERT: 1960s parents stalked their underaged kids even in their beds. More relevant they use Photogrammetry to create m89.

Admin = GOD?

b1
<https://0x8.ch/HackersCardgame7>

Inventor: philo01

Year: ~????
The existence of a **omnipotent Administrator**, especially if the **Mainframe** controls the whole world would / will destroy all beliefs: **belief in God**, belief in faith, belief in Religion, belief in beeing of use for anything

eternal life

b2
<https://0x8.ch/HackersCardgame7>

Inventor: philo02

Year: ~????
To promise **eternal life** would be a bad thing, better **do what you can do** aslong as you are alive, otherwise you would just be frustrated when life is about to end and you could not finish your lifetime Achievement.

ENDOCRINOLOGY

b1
<https://0x8.ch/HackersCardgame7>

Inventor: Endo01

Year: ~????
The (neuro-) endocrine system is highly complex. So one can influence behavior and health with homeopathic doses of chemical substances, but also with behavior or radiation. For me it is to complex to understand and im not sure if a doctor in endocrinology completely understands what would happen when you change just a small element in the complete system. If there is such a AI that helps the doctors to make patients healthy again it would maybe also subect to attacks. So hopefully some doctors are hackers to. I dont know a lot about medicine, but when i asked @unibas if they had a look at the insulin pumps they recommend to their doctors and students they did not answer. That was a few years ago when CCC talked about such things.

RETINA CCD
