

how they >try< to delete the brain

induced rage

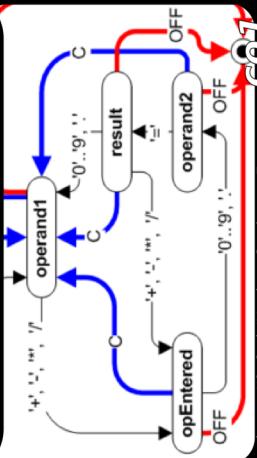

<https://0x8.ch/HackersCardgame7>

Inventor: **xxxxx** Year: ~???

With stimulus-reaction-habits, for example if you get always a reward (m8, see also card b1, b2, b3, t1...) and after 100 repetitions you would get punishment instead of a reward (m7) one can induce rage. Or if a person invests a lot of time in a game and then would be banned forever from the Game, even more worse if it was an unfair decision this could induce rage. If one has something like a spinal cord implant, then such psychological attacks could not kill, but if the spinal cord is hacked people can be killed without Psychological Warfare / Cognitive Dissonances. So in both cases Computers can produce people that run amok or suicide. You can not only blame the remote Controlled Person. Try to find both, the remote controlled BOT and the person developed that interface, Server: https://marcandoltchml_buzzer.net/2016/04/25/vorstufe-zu-breivik/

STATE DIAGRAM STATE MACHINE

Inventor: **xxx** Year: ~???

If you have a production line (that can be abused to program stimulus-reaction-habits), the line can have several different states, so you have to define the states and how / when (e.g. eventtrigger) they change, see e.g. Siemens S7 PLC. The same principle is unfortunately also abused against humans or even children:
1. **Normal:** loop { you will be rated } =>
2. **Annoyed:** someone says "Fu** your Mother!" =>
3. **Rage**
Induced with eg t1 or t* card

CARNIVORE (software)

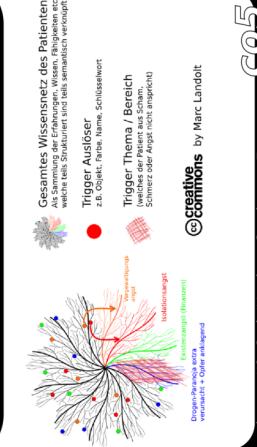

<https://0x8.ch/HackersCardgame7>

Inventor: **FBI** Year: ~???

Things the public people was informed about and then "suddenly" all people forgot about the thing. So maybe those things are deleted while you are dreaming / sleeping (cards t1, t10, t12...) as a default process for all people globally? If it would be a default process, everybody could maybe find out what they want to delete and focus more on that things.

CO5

<https://0x8.ch/HackersCardgame7>

Inventor: **xxxxx** Year: ~???

There are several (most non working) methods they try to format the brain of Whiteblowers, c1, c2, a16, dt1, m22, m27, m41, m44, m45, m15, t10, co4, m42, but definitely m19. Maybe deleting the scenes of a rape would help the victim, maybe.
Think of the drawing as a visual representation of the contents in your brain and the purple part is what they want to overwrite. Unfortunately brain is not two dimensional, so this would maybe work for a while, but, in the end nothing is really deleted. That's where the 1960s People have great long-term job opportunities in the surveillance business payed by the perpetrator, but after a while this "maybe" fails too... https://marcandoltchml_buzzer.net/2015/08/15/visuelle-representation-einer-seeligergesetzespsychologie/

PreRendered Destruktion

<https://0x8.ch/HackersCardgame7>

Inventor: **xxxxx** Year: ~???

They seem to know every cable in my local Network, and they put some sort of traps (Eventtriger) on my equipment to destroy as much of my equipment. Eg. making me pull the wrong plug, making me stand on equipment. For example here they showed me eg. on t1 card that this would be the power cable that i can pull straight, but in fact it was the HDMI cable that was upside down in my screen and broke the cable and even broke the HDMI Port on my monitor. The "be lazy stimulus" would prevent me from checking that, so the next time when i would be in hurry would waste my time. It is very likely that they simply could switch of devices by remote, but if they would do one would contact producer. So playing it that way would have another "advantage" for the offender, he then would loop you destroyed it by yourself" and play the "induced rage" card...

CO6

Inventor: **xxxxx** Year: ~???

When I was an about 10 year old boy "my voices" (t1, t10, t12... Card) told me to put wires to my genitals. In 2000 this programmed stimulus was often used by people at ABB Flexible Automation AG to dissociate me and to make me work faster and to make me look guilty I dont know if these people knew that this stimulus was used or if their stimocover showed something else like "Marc dissociates because he raped a girl" even when i never had sex until then. In 2010 i was forced to tell my shrink (Hr. Dr. Hansjorg P.) what i have done. He seemed to ignore that completely, did he knew about that? Then i was accused to be a terrorist and again in the Mental Institution Königsfelden. Was that the reason why they played the m41 Card with Sahrat? I also question the circumstance that in german it is called "Bananen-Stecher". **Obfuscates Technology Cards.** This happened after i got my first computer (c64) in the age of 6 years, so maybe this is a psychological-backdoor, maybe...

eStim

Inventor: **xxxxx** Year: ~???

If you would add a device to a webcam that can cause lot of PAIN, for example with sound above 120dB or with an implant or an Active Denial System that causes all nociceptors to fire at the same time? Maybe one would not see the cam after a while. This would be some sort of Skinner Box or classical conditioning (t2, t11) and maybe cards t10, t14, t15, t32, t33, m38, m26, endo1, e1, e2, e3, e4, involved. The cam would become invisible for the poor mouse. Even specific images shown on computer. So this would maybe the real reason why Pinky & Brain in Aarau i was part of: Primary School Käthchen (color 1), Bezirksschule Aarau (color 2), Boy&Girl Scouts Aarau (color 3), University of Applied Sciences (HFA) where i studied first (color 4). And this information was generated only from the interconnections between the elements (see a12 card) not even from the things people posted. If you would add Natural Language Processing and eg. some sort of Mayer-Briggs or Big 5 Psychology test you could generate quite good personalized Suicide Death Bots (see card a16), counter measure, warn the people that some criminal people did and do such things to me and are maybe doing such things also to other people

With Vectors and Matrices you can calculate Networks. For example this image is from an app that is not allowed anymore on facebook. It could extrapolate all my groups in Aarau i was part of: Primary School Käthchen (color 1), Bezirksschule Aarau (color 2), Boy&Girl Scouts Aarau (color 3), University of Applied Sciences (HFA) where i studied first (color 4). And this information was generated only from the interconnections between the elements (see a12 card) not even from the things people posted.
